

Environmental Policy

IBS Technology Spa, has decided to develop and implement at its premises an Environmental Management System, compliant with the international voluntary regulation UNI EN ISO 14001: 2015.

The organization has always been oriented towards optimizing production processes considering the environmental matrix and the protection of natural and energy resources.

The aim of the environmental management system developed by IBS to improve environmental performance while respecting the fundamental management principles is: "environmental commitment and policy, planning and evaluation of environmental aspects, measurement and control of the system". To achieve this goal, IBS Technology S.p.A. undertakes to invest resources to guarantee a process of continuous improvement of its environmental performance, an indispensable condition for being able to talk about "environmental policy".

IBS Technology S.p.A., undertakes to ensure compliance with applicable laws and all other applicable regulations and to ensure the continuous improvement of its environmental performance, through:

- optimization of the waste cycle;
- constant control and maintenance of systems and equipments used;
- choice of products that are less polluting and less dangerous both for environmental protection and for the health and safety of human resources;
- control of water, energy consumption and atmospheric emissions;
- awareness and training of personnel at various company levels to reduce the environmental impacts deriving from the organization's activities, in order to be aware of and responsible for environmental management and occupational safety.

In this regard, the Organization has established specific objectives, monitoring them constantly, to minimize any environmental risk related to business processes.

IBS also undertakes to carefully evaluate its suppliers of goods and services, choosing among these, qualified suppliers and operating in compliance with environmental management.

This environmental policy is the address to which all IBS staff is required to comply in the performance of their duties.

The introduction and maintenance of an Environmental Management System compliant with UNI EN ISO 14001: 2015, is the management tool adopted to pursue this Policy.

The Management undertakes to communicate the Environmental Policy to all personnel and remains known to suppliers and customers. IBS, undertakes to periodically review this environmental policy or in case of need.
